

ViseeO Handsfree Coding Dongle

The simplest way to installing retrofits on your Audi

ViseeO Handsfree Coding Dongle is designed for the engineers who need to diagnose vehicles while installing extra devices. Compare to the traditional diagnostic software, it avoids the time-consuming coding procedures and will automatically complete all the process once you plug it into the on Board Diagnosis (OBD) system box. Currently, ViseeO Handsfree Coding Dongle provides Audi A6 and A4 Handsfree coding function, and can code diagnostic interface on address 19, telephone plate on address 07 for Audi A6, and radio on address 56 for A4. With this simply handy plug-in coding and all Dianostic Trouble Codes (DTCs) clearance are carried out automatically. For the people want to avoid complex software operating, ViseeO Handsfree Coding Dongle is the best solution available on the market.

Simplest way to installing retrofits !!

**Traditional Complex Diagnostic software
Time-consuming! Complex! Not user friendly!**

V.S
