

Bluetooth Upgrade Kit For Mercedes Original Handsfree in-car System

The concept of MBU-1000 is to fit the brand image of Mercedes Benz with its decent and elegant look. It is not only an adapter but also a user friendly device. Users can easily pair MBU-1000 with any mobile phones they use via Bluetooth.

Imitated with the shape of the Nokia mobile phones, which accessorized with the original Mercedes Benz in car system. MBU-1000 will be recognized as the Nokia mobile phone while inserted into the cradle. Therefore, it fully intergrades with the steering wheel controls and radio keypads. Unlike the old Nokia phones, MBU-1000 is also a Bluetooth adapter that memorizes up to 3 recent paired mobile phones. User can only access his/her own phonebook profile. Moreover, radio system is muted when phone is being used and conversation will be conducted through car speakers and car microphones.

SPECIAL FEATURES

NEW DESIGN, RE-ENGINEERED, NEW EXPERIENCE
